

THIS IS NOT AN ALLERGEN FREE PROGRAM PLEASE PLAN ACCORDINGLY

Medications:

There will NOT be a nurse on staff at all time, there will however always be someone who is CPR and first aid certified here every day. If your child requires emergency medications i.e. epi pen or inhaler, they must be able to administer it themselves. If they require other medications, then the parent or guardian must be able to come and administer them.

Special needs/handicaps:

Children with special needs are welcome, parents/guardians/caregivers need to be with the child during the program at all times if the child requires assistance with ADL's. Service animals are welcome (not emotional need animals) and for hygiene reasons parent/guardians/caregivers must be present to deal with the animal waste/food/water needs.

Volunteers:

All adult volunteers have been background checked for criminal and sexual offenses.
